

Secure Email Messaging

For the Finance Industry

Your clients are demanding greater protection of their information.

Traditionally financial service companies have not been at the forefront of email security, despite having a responsibility to protect highly confidential client information. This has caused frustrating client communications as well as the growing frequency of security incidents that have impacted their clients.

As experts of finance you know that there is increasing pressure to safeguard customer data in an environment of growing regulatory oversight. You want to provide a service to them that puts their mind at rest and in turn generates long-term customer retention, trust and profit for your business.

So wouldn't it be good if you could offer your client's password protected emails or the reassurance that you can quickly and easily recall emails that have been sent to the wrong person?

Well now you can...

Over 60% of companies
have experienced a
breach of data.

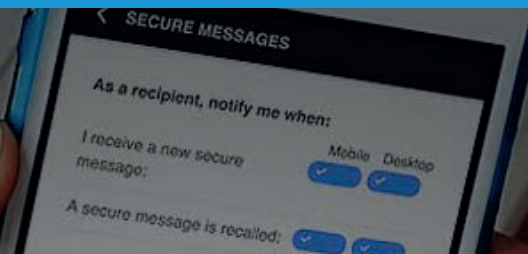

Introducing Secure Email Messaging.

Secure Email Messaging is far more than traditional encryption. It's an information management tool that enables you to easily protect and control access to your email and all of the valuable content and client information that flows through it.

Secure Email Messaging is a cloud-based encryption and message control platform that's easy to use and quickly integrates into an existing email infrastructure and into any third-party archiving system. Secure Email Messaging enables finance firms like yours to easily protect, control and manage the exchange of information, even after content has left the email outbox.

Giving you a competitive advantage and allowing you to win more business.

Secure Email Messaging is becoming a core information management and communications tool that encompasses not only secure email, but also data loss prevention, large file transfer and secure mobile messaging; fulfilling all of your client's needs.

Financial service organisations that adopt Secure Email Messaging differentiate themselves in the marketplace with a superior client experience, increased worker productivity, reduced expenses, and a reputation of trust.

With that in mind you want to stand out from the rest and provide a service to new and existing clients above and beyond that of your competitors. In today's information-rich finance environment, Secure Email Messaging is a critical tool for financial experts looking to maintain a competitive edge.

A solution that benefits everyone.

Simplified Secure Communications:

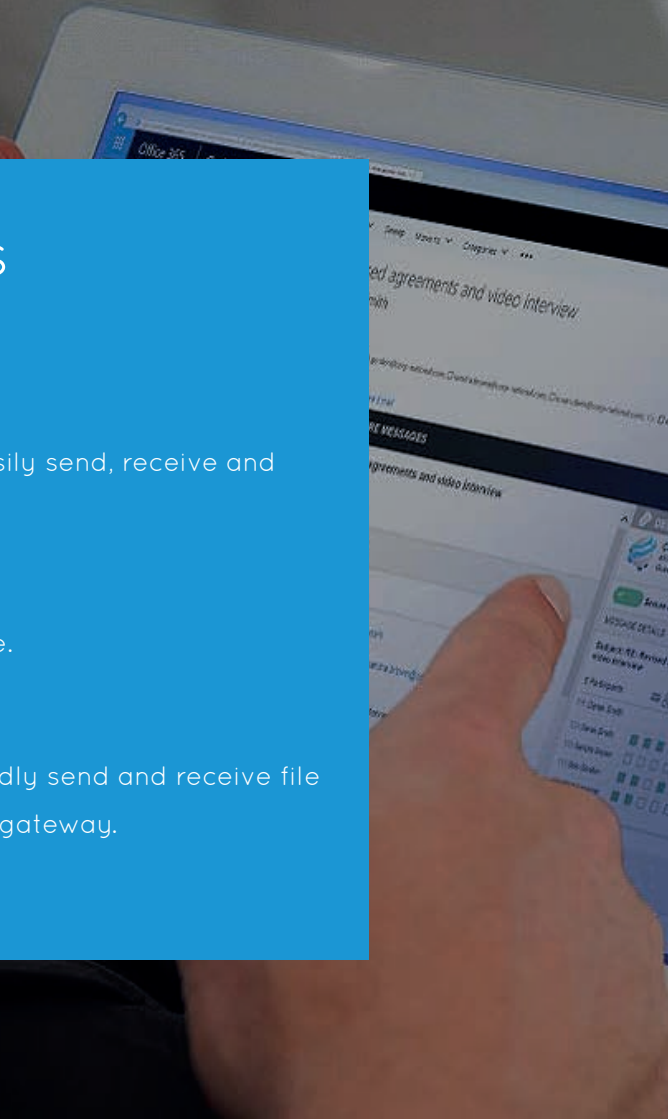

With Secure Email Messaging you can securely and easily send, receive and track email communications on any device.

Regulatory Compliance:

Secure Email Messaging ensures regulatory compliance.

Secure Large File Sharing:

Secure Email Messaging allows users to easily and rapidly send and receive file attachments of up to 5 GBs without clogging the email gateway.

Seamless Integration:

Secure Email Messaging quickly and seamlessly integrates into your existing email infrastructure including Outlook and Office 365.

Individually Branded Environment:

Secure Email Messaging's secure information management platform is individually branded to match the "look and feel" of your business.

Secure E-Signatures:

Secure Email Messaging makes it easy for you to securely request and provide e-signatures on documents and image files directly within a secure message. The process takes seconds at either end and is fully secure, ensuring data integrity, compliance and non-repudiation.

Advanced Control Features:

Secure Email Messaging's Delivery Slip control panel empowers you to track when an email is received and read and to control whether it can be replied to or forwarded. You can recall a message after it has been sent and apply password protection for sensitive information.

Data Loss Prevention:

Secure Email Messaging works with any existing data leak prevention engine to help prevent unauthorised or mistaken sharing of sensitive or prohibited content and offers 'intelligent content scanning' based on security policies.

Enhances collaboration and productivity:

Secure Email Messaging's advanced control features, secure e-signatures and rapid large file sharing capability gives users to quickly and confidently share sensitive information and large documents.

Affordable:

As a cloud-based solution, Secure Email Messaging significantly reduces costs compared to in-house solutions, which are expensive to implement and maintain.

Safeguards against data loss:

Secure Email Messaging offers the most advanced protection and message control. With true message recall and the ability to expire messages at a later date (so recipients can no longer see them) data is always protected.

Empowers better decisions:

Secure Email Messaging gives you real-time knowledge about the receipt and opening of emails sent. With this information you are better informed and able to eliminate needless follow-ups.

A hand is holding a smartphone in the foreground on the right side of the image. The phone screen displays a 'SECURE MESSAGES' interface. At the top, there is a back arrow and the text 'SECURE MESSAGES'. Below that, it shows 'Legal_Agreement.pdf'. There is a 'Page width' dropdown menu and a page indicator '4 of 4'. The main content of the screen is a document titled 'E-SIGNATURE CERTIFICATE' with various fields and text, including a signature area with the name 'Zorke Smith'. The background of the entire image is a dark, textured wall with a grid of small circular holes.

Builds a company's brand:

Secure Email Messaging builds a reputation of trust and security so that your customers and prospects feel confident sharing information.

Supports secure mobile device management:

Secure Email Messaging extends the secure messaging environment to smart phones and tablets to enable a secure BYOD environment.

Integrates with any existing archiving system:

Secure Email Messaging provides simple, automatic decryption with any existing archiving system to ensure internal information management processes are seamless and easy, from start to finish.

Give your customers the service they deserve
with Secure Email Messaging.
